

Stephen Forbes

Software Developer

Bachelor's in Computer Science, Kansas State University, 2020

forbes3559@gmail.com | 913-832-9485

Professional Summary:

Experienced developer creating front end experiences for 5 years. Quick to ramp up on new projects and immediately owning tickets with minimal direction. Often sent to problem projects to provide front end expertise and meet deadlines.

Skills

Javascript (Expert) · Typescript (Expert) · CSS3/SCSS/LESS (Expert) · React (Expert) · Vue (Proficient) · React Native (Proficient) · Node.js/Express.js (Proficient) · Git Version Control (Proficient) · Jira/Monday (Proficient) · Agile (familiar) · PostgreSQL (familiar) · C# (familiar)

Experience

Builder Designs, Lenexa, KS (hybrid)

Front End Developer

Apr 2025 – Present

- Developed homebuilder websites using a React/Redux CMS-driven architecture, binding live property data to custom UI components via a proprietary HOC data layer.
- Solely designed and owned 4 homebuilder websites end-to-end while contributing to 10+ additional builds and helping maintain 100+ production sites.
- Engineered an AI support ticket workflow that interfaces with the GitLab and Monday.com CLIs to ingest a ticket, attempt a code-level fix, surface a diff for developer review, and upon approval create the merge request and update the Monday ticket - reducing manual overhead across the team.

Productive Edge, Chicago, IL (remote)

Front End Software Developer III

Sep 2021 – Feb 2025

- Created complex digital solutions using various tools and languages including React, Vue, React Native, Node, Express, Javascript, Typescript, HTML, CSS, and .Net.
- Participated in Agile ceremonies as front end lead and worked closely with PM to define stories as well as conducted technical and screening interviews for interns and contractors coming on to our team.
- Collaborated and code reviewed with both Front End and Back End Devs while developing more than 12 React, React Native and Vue projects for healthcare companies such as Blue Cross Blue Shield, Vitality, Madela, and Bamboo.

Primitive, Lubbock, TX (remote)

Front End Developer - Contractor

Jan 2021 – Sep 2021 & Feb 2025 – Mar 2025

- Built websites using Hubspot as the CMS and HTML/CSS, Tailwind CSS and Alpine.js for the Front End for 5 different companies/hospitals.
- Worked closely with the Lead Developer to refine best practices at the company and participated heavily in sprint planning and retrospectives.
- Gained expertise in Web Dev Front End basics such as HTML, SCSS, React, JavaScript, JQuery, and SEO.

Projects

Humana Dental Vision D2C | Vue, Razor, .Net

- Maintained the Direct to Consumer flow using Razor, Javascript, and CSS/LESS in a .net environment/framework.
- Revamped the Front End for the new D2C flow using Vue to decouple the Front and Back End.

Vitality AI Chatbot | React, TypeScript, Zod, Azure

- Utilized React to implement the UI for an AI chatbot that used machine learning to parse through hundreds of insurance documents and give back information to the user based on the company's healthcare policies.
- Worked closely with a Data Science Engineer to get proper results on the front end based on changing values within Azure.
